With Datanational's EDI Management and Support

Meet the deadlines, keep your orders flowing, and receive live support with Datanational's EDI Support Services for System i.

We have in-depth knowledge of the Inovia TrustedLink software (iSeries and Windows editions) and Gentran; we also have experience with Future Three and Extol.

Datanational is an EDI Business Partner with a number of highly qualified EDI professionals specializing in the implementation and integration of EDI software with System i ERP systems. Our many years of hands-on experience with EDI includes the complete implementation of various EDI software including installation, data mapping, trading partner testing, EDI process documentation and live support.
