

Take Control of Your

IBM System i Implementation

Datanational's system management and hosting will give you peace of mind around the clock when it comes to your company's IT operation. Just consider the following:

- Real-world eBusiness applications have created a requirement for business systems to be highly available with high bandwidth connections over the Internet
- IT systems (ERP, Email, WMS, EDI, etc) are expected to be available 24/7
- IT must deliver increased uptime and system reliability while reducing the total cost of management and monitoring of these systems

System Management and Hosting

Our data center, or one of our Business Partner's colocation sites, will provide a managed physical environment, suitable for operation of the hardware to meet with the stated system availability target. This facility will provide appropriate security, redundant power supplies, backup UPS and a generator. A high-speed IP Internet connection with expansion on-demand is provided, along with a managed firewall solution. Datanational will provide options for System Management Services and an Operations Help Desk to answer and respond to system related calls during the selected support time frames.

24/7 System Support

- Help Desk Operations
- System and Application Monitoring
- Technical System Support Services
- Network Support Services
- Cross Platform Operating System Support
