Dear Sandi,

I am pleased to provide a reference letter for Datanational Corporation. Your company has been instrumental to our success in providing IT solutions for several sequencing projects to major automotive customer. Not only did you provide this solution and implement it at one of our facilities with limited timing, you were also able to provide a similar solution at another site for yet another automotive customer. The partnership we have formed with Datanational was a key to our success in providing our customers with a flawless sequencing system. Your support of these systems and the responsiveness to change requests has been exemplary.

Further, in the July 2007 timeframe, we were faced with another need to place a bar code label on two parts to our customer. While this might seem like an easy project, in order to error proof the labeling, we needed to tie the system into our existing Oracle manufacturing and reporting system. You were able to give us the solution we were looking for and integrate it into our existing system with the error proofing required.

Your implementations have always been on time and within budget. We view you and your company as a leader in sequencing/IT solutions. Working with you has been a pleasure. I would welcome a call from any of your potential customers.

Regards,

*Cindy LaRocque*
