

Your PRMS Technology Partner

For over 30 years, Datanational has been providing hardware, software and services to fulfill our customers' information system needs. Our expert knowledge of PRMS dating back to 1990 and our long-standing knowledge with the IBM i5 and iSeries (AS/400) platform have allowed us to deliver creative and innovative business solutions to companies throughout North America.

We are constantly reviewing our offerings and pursuing new opportunities in order to align ourselves with the ever-changing business needs of our customers. Our years of experience, diverse skill set, and hands-on approach allow us to successfully deliver the desired results based on our customers' requirements.

The Datanational Advantage

Due to our broad talent pool and great diversity in skill sets, we are able to deliver a range of projects, from smaller programming engagements to full-blown, multi-site PRMS implementation services. We have resource talents ranging from Programmer/Analysts, Senior Programmer Analysts, Project Leaders, Project Managers, Project Implementers and Consultants, under the guidance of one of our Corporate Vice Presidents.

Our proven project methodology has been highly successful in our past PRMS projects. Our continuous exposure and hands-on approach with mission-critical projects has dictated the development and growth of our company. These factors have directly contributed to our position and attitude towards selfless dedication to our customers and our ability to maintain long-term relationships with them.

Service Commitment to Our Customers

As a services organization, we take great pride in our work and count on our clients to refer us to other companies who may benefit from our professional services. Our track record of success is based upon our obsessive commitment to customer care. We take our responsibility for their mission-critical application systems very seriously and exercise great care in delivering our services.

We are not just a consulting firm who will assess the situation and then tell the customer what needs to be done, without actually doing it. We are always in the trenches, shoulder-to-shoulder with our customers, their IT personnel and their users. We become an integral part of their team. We simply care about our work, and our customers have repeatedly stated that we are a different kind of company because of that.

We are project oriented, not "work" oriented. We manage to the constraints established for the project. We are practical problem solvers. We make customer challenges our challenges. We are more than just a PRMS Service Provider, we are your technology partner.
