

Datanational Corporation Launches a New Website Dedicated to IT Solutions for the Automotive Aftermarket Companies

Farmington Hills, MI. - Datanational Corporation, a leading provider of enterprise software solutions, announces the launch of a redesigned website, www.AftermarketIT.com, showcasing Automotive Aftermarket IT solutions. The website has been updated to highlight Datanational's specialization in the implementation of Automotive Aftermarket specific IT initiatives. Examples of some of the solutions featured on the website include various eBusiness initiatives, system management and hosting services, disaster recovery and high availability solutions, EDI support and integration, as well as general IT development and consulting services.

Datanational provides IT resources to evaluate, analyze, design, program, test and implement IT projects. We extend the resources and knowledge base of our clients' existing IT staff in order to meet the demands of a specific project until it is completed. We specialize in the implementation of Automotive Aftermarket initiatives through deployment of new technologies integrated with traditional systems. We implement evolution with these new technologies rather than create a revolution with the existing Aftermarket systems. Most of these projects deliver opportunities for internal business cost reductions and revenue enhancement. Visit the website to learn more: <http://www.AftermarketIT.com/>

Datanational Corporation is the premier vendor of choice for customers looking for technology solutions. Our years of experience, diverse skill set, and hands-on approach allow us to successfully deliver the desired results based on our customers' requirements. Our continued technology focus provides us with the ability to become not only an IT solution provider, but also a Technology Partner. Visit us on the web at www.datanat.com, or contact us via email at sales@datanat.com.
