## **Datanational Corporation Introduces CNG Assembly Process Automation Software**

Farmington Hills, MI. - Datanational Corporation, a leading provider of enterprise software and services, is proud to introduce a new Manufacturing Execution System software module for CNG Assembly Process Automation. PlantTalk:MES provides for a controlled, validated and fully traceable installation and assembly process for the assembly and installation of CNG (compressed natural gas) and LNG (liquefied natural gas) systems in passenger and commercial cars and trucks.

With the PlantTalk solution in place, the CNG assembly and installation operation is optimized to provide full process control and traceability to ensure an error-free, step-by-step validated process. The system has been implemented and proven in specific CNG tank manufacturing, assembly and installation environments, taking into account the unique features of this process.
