Datanational Corporation to Exhibit at Cloud Connect Chicago Conference

Farmington Hills, MI. - Datanational Corporation, a leading provider of enterprise software solutions, will be an exhibitor at Cloud Connect, the defining cloud conference and expo for IT professionals, developers and leading cloud providers. The conference will be held September 10-13, 2012 at the Hyatt Regency, O'Hare in Chicago, Illinois.

Datanational and Vision Solutions have partnered together to showcase several Cloud-based technologies for data backups, disaster recovery and high availability. These solutions feature the world class replication technology from Vision Solutions for platforms like Windows, AIX, Linux, and IBM i. Datanational can provide different levels of server protection and recovery. As a multi-platform Cloud Services Provider and systems integrator, Datanational has the expertise to host, monitor, and manage mission-critical application systems around the clock. Cloud Connect is the one event that brings together cloud customers and cloud operators who are looking to accelerate their cloud strategy while driving growth and innovation.
