Datanational Corporation to Exhibit and Hold Session at COMMON 2014 Fall Conference and Expo

Farmington Hills, MI. - Datanational Corporation, a leading provider of enterprise software solutions, will be an exhibitor and hold a session at the COMMON 2014 Fall Conference, a premier educational, networking, and innovations event for the Power/IT community. The conference will be held October 27 - 29 in Indianapolis, Indiana.

The COMMON 2014 Fall Conference and Expo brings together developers, IT managers, and industry experts from around the world to deliver over 100 educational sessions, certifications, new solutions and more. Two and a half days of leading educational sessions and labs are all crafted to be the most relevant to the community. The Fall Conference is one of COMMON's most cost-effective and time-saving event.

Datanational's Derrick Smith will hold a session regarding how to optimize your backup and disaster recovery processes for your enterprise. Protecting business-critical data, applications and operations against downtime and disruptions is crucial for organizations. Derrick will share how Datanational has implemented different vaulting and replication technologies for many customers who previously struggled with the rising costs and complexities of data storage, backup and disaster recovery processes. Datanational offers best-in-class backup and recovery services for the IBM Power System platform, and also Windows. These solutions can be designed to be cloud-based, on-premise, or a hybrid of both configurations.
