Datanational Corporation Partners with i365 to Offer EVault as a Service

Farmington Hills, MI. - Datanational Corporation, a leading provider of enterprise software solutions, is excited to announce a business partnership with i365. i365 develops professional-grade on-premise and cloud-connected storage solutions for small and mid-size businesses (SMBs) and remote office/branch office (ROBO) locations. This partnership allows Datanational to resell i365's disk-to-disk backup software EVault®.

Datanational is proud to add EVault to their system recovery service line. EVault data backup software securely and efficiently backs up virtual and physical systems, either onsite or via remote backup, and seamlessly extends IT infrastructure into the cloud. EVault backs up dynamically, so there is no need to restore from multiple incremental backups. This solution allows for an easy restoration across multiple operating systems and platforms and, using various EVault Plug-ins, back up and recover critical data within individual databases, mailboxes, and cluster nodes.

Datanational is an EVault Cloud-Connected Service Provider. Backed by i365 and the EVault cloud, we deliver secure, reliable and efficient EVault SaaS-based backup and recovery services to our customers, as well as replicate their data to the trusted EVault cloud.
