Datanational Corporation to Exhibit and Hold Session at MITEC 2013

Farmington Hills, MI. - Datanational Corporation, a leading provider of enterprise software solutions, will be an exhibitor and hold a session at MITEC 2013, Michigan's 8th annual IBM i and AIX Technical Education Conference. The conference will be held on Tuesday, June 4 2013 at the VisTaTech Center, Schoolcraft College in Livonia, Michigan.

MITEC 2013 is an affordable way for companies to stay on top of new technologies. MITEC offers a variety of topics through-out the day, allowing for a flexible schedule that is sure to pack the most education into your day. There will be over 50 sessions led by industry experts. Topics include RPG, CLM, Client Access, PHP, SQL, Disaster Recovery, IASP, Open Source, DB2 Web Query Lab, AIX Updates, IFS, Web Development, XML, RDP, Security, VIOS, Java Toolbox, OS7.1 Geo Monitoring, and many more.

Datanational's Derrick Smith and Kevin Thweatt will hold a session regarding a Cloud-based Backup Solution and Disaster Recovery for IBM i. This approach will not only provide an opportunity to significantly reduce recovery times by providing a turn-key disk-to-disk backup solution, it may also deliver immediate improvements to a company's bottom line by reducing operational expenses related to the daily tape management and offsite tape storage and transportation fees.
