

## **Datanational Corporation Offers System Management and Hosting for IBM System i**

Farmington Hills, MI. - Datanational Corporation, a leading provider for enterprise software solutions, offers 24/7 system management and hosting for the IBM System i platform (iSeries, AS/400). As a multi-platform services provider and system integrator, Datanational has the expertise to monitor, manage and host mission-critical application systems around the clock. We provide a broad base of service offerings, including hardware, operating system and application software expertise. This combination of skills delivers a wide range of available solutions to our client base.

Based upon our 30+ years of experience and through our strategic partnerships, Datanational Corporation has strategically invested in the business infrastructure to deliver systems, facilities and bandwidth on-demand. We are successful in system management and hosting through our many years of accumulated knowledge in the operation of various types of systems across many different industries. We deploy highly creative technology solutions for system management, monitoring and notification.

Our data centers provide a managed physical environment, suitable for operation of the hardware to meet with the required system availability target. We provide appropriate security, redundant power supplies, backup UPS systems and backup generators. A high-speed IP Internet connection providing dedicated bandwidth with expansion on-demand up to 100MB is provided, along with a managed firewall solution.

We also provide options for System Management Services and an Operations Help Desk to answer and respond to system related calls during the selected support time frames. Familiarity with existing systems provides a more effective and customized High Availability (HA) and Disaster Recovery (DR) solutions. In addition, with our knowledge of Enterprise Resource Planning (ERP) and eBusiness software, we can provide business application support.
