Datanational Corporation to Host Webinar: High Availability and Disaster Recovery Protection for Windows

Farmington Hills, MI. - Datanational Corporation, a leading provider of enterprise software solutions, will be hosting a webinar addressing Windows High Availability (HA) and Disaster Recovery. The webinar will be a 30 minute informational overview of a cloud-based server and data protection plan. It will take place on Thursday, August 23rd at 2 PM EST (11 AM PST).

The webinar will feature turn-key High Availability and Disaster Recovery protection options for Microsoft Windows environments. This approach includes the Double-Take replication software, target hardware and software, required bandwidth, and 24/7 managed services. This solution is provided as a managed pay-as-you-go monthly subscription, without the need for significant capital expenses for backup hardware, software and the support staff to monitor the implementation.

To register for the webinar, visit <https://www3.gotomeeting.com/register/238628182>.
