Datanational Corporation to Host Windows High Availability in the Cloud Webinar

Farmington Hills, MI. - Datanational Corporation, a leading provider of enterprise software solutions, will be hosting a webinar addressing Windows High Availability (HA) in the Cloud. The webinar will be a 30 minute informational overview of a subscription-based server and data protection plan. It will take place on March 14th at 2 PM EST (11 AM PST).

The webinar will feature a turn-key, HA protection plan. This solution includes the Double-Take replication software, target hardware and software, required bandwidth, and 24/7 managed services. This entire solution can be provided as a managed pay-as-you-go monthly subscription, without the need for significant capital expenses for your backup hardware, software and the support staff to monitor the implementation.

To register for the webinar, visit <https://www3.gotomeeting.com/register/502458494>.
