Datanational Corporation to Host a Webinar on a Cloud-based Backup Solution

Farmington Hills, MI. - Datanational Corporation, a leading provider of enterprise software solutions, will be hosting a webinar on a cloud-based backup solution for all major computing platforms, including Windows, System i, Linux and AIX. The webinar will be a 30 minute informational overview of a subscription-based server and data protection plan. It will take place on April 18th at 2 PM EDT (11 AM PDT).

The webinar will feature a cloud-based solution built on enterprise class disk storage technology. This solution reduces backup costs and is a more modern and efficient data management solution that utilizes disk-based technology and online backup. Cloud-based backups offer reliability, accessibility, scalability and affordability that is simply not possible with traditional tape backups.

To register for the webinar, visit <https://www3.gotomeeting.com/register/235546630>.
